Intranet & Cloud Solutions for Facility Management

## Offering security services to the occupant, Ciconia 8 is a tailored solution to your company's structure and needs.

This software allows you to streamline and manage the daily activity of your services dovetailing with the demands of your partners and the security of the company.

Ciconia 8 is made up of functional and complementary modules, each covering a management perimeter designed to fit in with the various sectors of the company.

This software suite can manage all the key processes. Users in various areas work in the same software environment, built on a referential database.

Our solutions allow for easy communication and cooperation between the departments of the company.

Ciconia 8 gives you access to precise reports for reliable and fast control of company workings using data transmitted in real time.

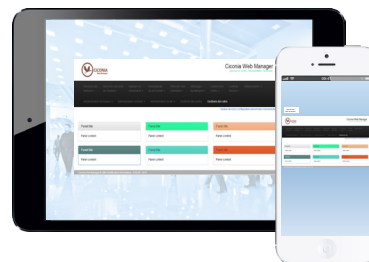

By making sure that your data is always complete, by reducing processing and input time, with a single base of information, Ciconia 8 will boost your productivity.

These solutions address the requirements of general services, site managers, reception personnel, people working in logistics, security, human resources and the occupants, proposing a series of simple and ergonomic tools that are safe and easily adjustable.

With 20 years of experience in company organization and security services, **GMH 2i** is constantly improving by incorporating and developing new functionalities to meet the demands of its customers and the requirements of the market.

Ciconia will soon become a practical and efficient tool for all your co-operators.
